Versatile Interfaces

H.265 High Efficiency Video Coding

Advanced H.265 encoding brings 4K wireless transmission to a new level of clarity and stability. At the same bitrate, images are cleaner, motion is smoother, and every detail is preserved, so directors, cinematographers, and clients see exactly what matters.

Wireless Camera Control Gets Smarter

CineView SE 4K adds wireless camera control, allowing the camera to be operated remotely through the Accsoon SEE App. Powered by advanced wireless transmission technology, delivering a stable and low-latency control experience, greatly improving creative efficiency and precision.

✔ Touch Focus

AF touch focus works in any zone, just tap to shift focus or drag the box to follow your subject.

✔ Record Trigger

Simultaneously and bi-directional record on the camera, as well as the monitor.

✔ Seamless Control Access

The main parameter control menu brings up shutter speed, aperture, ISO and white balance options in the top status bar of the monitor.

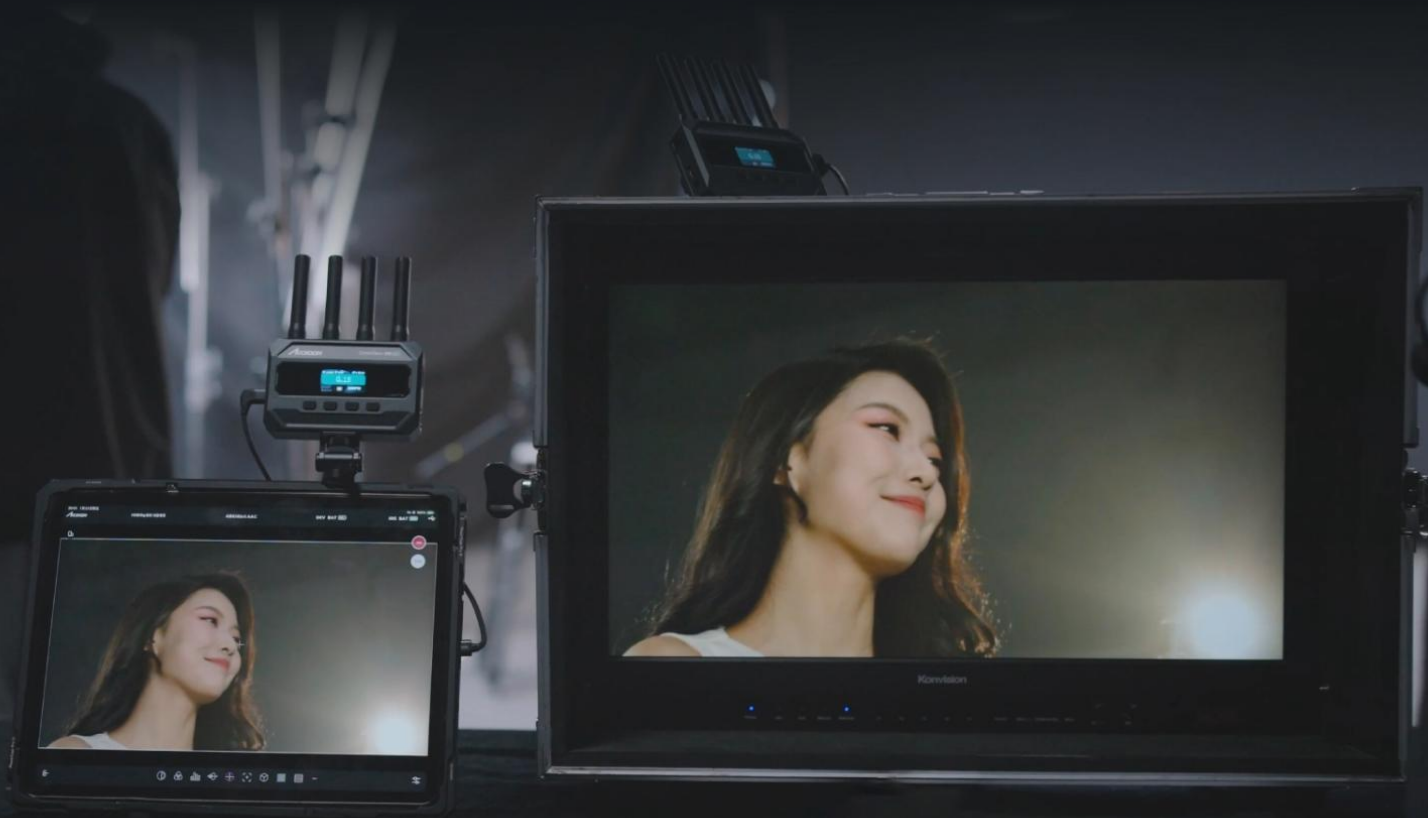

*Support camera models Sony FX3 FX30 A7C II A7SM3 A7M4 A9M3 | Canon R5 R6 R5 II R6 II R7 R8

*Accsoon is committed to adding additional cameras from other makers, as well as additional Canon and Sony models.

*Camera control is only supported via Wi-Fi connection to the transmitter, not available through RX USB connection.

USB Wired Monitoring for Mobile Devices Supported on Both TX & RX

HDMI + SDI Dual Interfaces

Equipped on both transmitter and receiver,
it is widely compatible with devices ranging from consumer to professional cameras.
